Continuation of 2. NOTE: Applicants previously searched.

esed amendment of claim 17 presents an order

e claimed subdomain structure not

Continuation of 5. does NOT place the application in condition for allowance because: Applicants traverse the current 103 rejection of claims 1-17 on the following basis. Applicants submit that the instant application is a continuation of U.S. Patent Application Serial No. 08/269,118 filed June 30, 1994, thus U.S. Patent 5,434,070 issued July 18, 1995 is not prior art against this application. Applicants further submit a declaration that the invention disclosed and claimed in the present application was concieved prior to June 14, 1993, the issue date of U.S.Patent 5,320,958 and applicants claim priority from the applications which issued as the '070 and '958 patents. This argument is not found persuasive for the following reasons. In the original 103 rejection of these claims it was noted by the examiner that the instant application recieves the benefit filing date only of June 30, 1994, for subject matter of RT's from any organism other than E.coli. and M. xanthus. Applicants are reminded that it is not the issue date of the above U.S. Patents that is important, but rather the filing date, which precedes the priority date for the instant application, as well as the date of the submitted 1.131 declaration. Further applicants are reminded that a properly executed 1.131 declaration must be signed by all inventors/applicants.
